# Asymptotic Problems, Elliptic and Parabolic Issues

June 1–5, 2015

Organizers: M. Chipot, A. Eismontaite, K. Pileckas, M. Skujus

Besides Asymptotic analysis of Elliptic and Parabolic problems, the topics of the conference include Fluid Mechanics, Free Boundary Problems, Evolution Problems in general, Calculus of Variations, Homogenization, Modeling and Numerical Analysis. In addition to the plenary talks parallel sessions will be organized.

## Invited Speakers

- |                           |                                   |
|---------------------------|-----------------------------------|
| C. Alves (Campina Grande) | G. Panasenko (St. Etienne)        |
| H. Amann (Zurich)         | P. Quittner (Bratislava)          |
| J. A. Carrillo (London)   | W. Reichel (Karlsruhe)            |
| Y. Du (Armidale)          | G. Seregin (Oxford)               |
| G. Galdi (Pittsburgh)     | H. Shahgholian (Stockholm)        |
| Y. Giga (Tokyo)           | V. A. Solonnikov (St. Petersburg) |
| P. Guidotti (Irvine)      | R. Temam (Bloomington)            |
| M. Fila (Bratislava)      | N. N. Uraltseva (St. Petersburg)  |
| M. Korobkov (Novosibirsk) |                                   |
